## FLAVOR-ACTIVE PEPTIDES

## **Abstract**

5

The present invention pertains to specific peptides obtainable from cocoa beans and giving rise to a particular and distinct savor when subjected to a Maillard reaction with reducing sugars. In particular, the present invention pertains to the use of one or more of these specific peptides for the preparation of a chocolate flavor, specifically a cocoa and a caramel flavor, a floral or specifically, a bonbon flavor, a bready flavor, a roasted flavor or a meat flavor.
